-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9, 10, and 12-16 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Reddy et al (US 5626893).

Reddy et al teach the use of *Pediococcus acidilactici* in the production of cheese (see entire document, especially column 11, lines 60-65).

Aromatization would be no more than inherent and/or obvious to that of Reddy et al as the same components and process steps are used.

Claims 9, 10, and 12-15 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Vedamuthu (US 5445835).

Vedamuthu teaches the use of *Pediococcus acidilactici* in the production of yogurt (see entire document, especially column 3, lines 18-40).

Aromatization would be no more than inherent and/or obvious to that of Vedamuthu as the same components and process steps are used.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Reddy et al (US 5626893) or Vedamuthu (US 5445835).

Reddy et al disclose the use of *Pediococcus acidilactici* in the production of cheese (see entire document, especially column 11, lines 60-65).

Vedamuthu discloses the use of *Pediococcus acidilactici* in the production of yogurt (see entire document, especially column 3, lines 18-40).

The claim differs as to the specifically claimed strain.

Once the art has recognized the use of a bacterium to serve a specific function, the use and manipulation of additional strains would be no more than obvious to one of ordinary skill in the art. In the absence of a showing to the contrary, Applicant is using known components to obtain no more than expected results.
